Brain damage
Breast biopsies more than 2 in 5 years
Cancer (except skin) treated or diagnosed
in past 5 years
Cardiac bypass surgery
Cardiomyopathy
Cataracts or glaucoma
Cerebral Palsy
Cerebral shunt placement
Chiropractic or physical therapy treatment
more than 5 times in last yr
Chronic bronchitis
Chronic fatigue
Chronic hepatitis B, C or D
Chronic kidney disease

Chronic lyme disease
Chronic Obstructive Pulmonary Disease
Chronic Pancreatitis
Cirrhosis of the Liver
Cochlear implant
Colitis, Crohn's, irritable bowel syndrome,
inflammatory bowel disease, familial
polyposis
Congestive Heart Failure (CHF)
Connective tissue disorder
Coronary Heart Disease
Coronary Insufficiency
Cystic Fibrosis
Deep venous thrombosis (DVT)
Dementia
Depression
Diabetes – Type I or Type II
Disc disorder treatment including surgery
or injection therapy in last year
Diverticulitis
Down's syndrome
Emphysema
Endometriosis, uterine fibroids
Epilepsy, or seizure disorder
Epstein Barr
End stage renal disease ESRD)
Fibromyalgia
Friedreich's Ataxia
Gall bladder disease with gall stones but
without removal of gall bladder
Gastric bypass or gastric restrictive
procedures like lap band
Gastro esophageal reflux disorder treated
with medication or surgery
Heart valve replacement
Hemochromatosis
Hemophilia
Hodgkin's Disease
Huntington's Chorea
Hydrocephalus
Hypertension
Interstitial lung disease

Kidney disease being treated with medications such as Procrit, or Epogen
Kidney Disease requiring dialysis
Kidney or bladder stones
Knee, hip or joint replacement recommended or existing
Leukemia
Lupus Erythematosus Disseminate
Major Organ Transplant
